SUMMARY

Full Stack Engineer with 3+ years of experience developing and deploying scalable web applications with 100% success rate that drive business results.

EDUCATION

Bachelor of Engineering - Computer Science, MVJ College of Engineering [8.5 CGPA] (2017-2021)

SKILLS

Technical Skills	**Frontend:** HTML, CSS, JavaScript, ReactJS, Tailwind CSS **Backend:** Node.js, MySQL, SAP ABAP, SAP CRM **Cloud Services:** AWS **Tools & Technologies**: Git, Redux, Appwrite, MongoDB, Vercel
Soft Skills	Communication, Leadership, Collaboration and Teamwork, Ownership
Learning Endeavours	Data Science, AI & ML, Generative AI and Prompt Engineering, NextJS, Flutter and React Native

EXPERIENCE

Senior Software Engineer   2022 - Present

Capgemini   *Bengaluru, India*

- Spearheaded the optimization of AdobeForms through advanced coding in ABAP and JavaScript, resulting in a 40% reduction in form processing time and enhanced user experience for over 500 users per month.
- Streamlined project management processes by integrating agile methodologies, resulting in the successful delivery of 5+ projects within tight deadlines and increasing efficiency by 25% across three departments.
- Designed and implemented innovative features in a collaborative environment with cross-functional teams, leading to a 25% increase in user retention rates and a substantial enhancement in overall customer satisfaction metrics.
- Executed comprehensive peer reviews on coding standards which led directly towards achieving higher compliance rates above industry benchmarks after completing more than twenty review cycles.

Software Engineer   2021 – 2022

Capgemini   *Bengaluru, India*

- Awarded 'Rising Star' achievement for exceptional performance in the first year of employment.
- Refined code performance by 20-30% across multiple technologies, contributing to overall system optimization.
- Quickly adapted to the company ecosystem by learning internal tools, processes, and team dynamics.

PROJECTS

Interaction Centre Components. Developed and optimized web components for ICWeb using JavaScript and Tailwind CSS, integrating them seamlessly with backend services.

Personal Blog Tool. Engineered a personal blog application using React, Redux, and Tailwind CSS, achieving a user-friendly interface that improved user engagement metrics by 40% and increased repeat visits by 25% within the first month.

Recipe finder web application. Launched a recipe finder application leveraging FreeMeal API, React, and Tailwind CSS; revamped user engagement by incorporating a favourites feature, resulting in increased user retention by 30% within three months.

EXTRA-CURRICULAR ACTIVITIES

- Launched a full-stack development project that simulated real-time data processing; designed and executed performance tests which processed over 100k records in under 10 seconds, showcasing an advanced understanding of efficient algorithms.
- Joined 20+ tech seminars, culminating in the acquisition of actionable insights that improved team collaboration and project outcomes, resulting in a 15% increase in successful project completions.
